

HTML Validation - InFEUP

We used the HTML checker in <https://validator.w3.org/nu/> to evaluate the html of our pages

We checked using this three files:

The layout file: app.blade.php

The post details page: post.blade.php

The profile page: profile.blade.php

Results:

in the layout file:

The only problem encountered was:

Warning Section lacks heading. Consider using `h2` - `h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 102, column 9; to line 102, column 30

```
<section id="content">
```

in the post page:

Error Stray end tag `div`.

From line 117, column 1; to line 117, column 6

```
<br></div></div>
```

Error Stray end tag `div`.

From line 118, column 1; to line 118, column 6

```
</div></div></div>
```

in the profile page:

No errors encountered

Conclusions

After seeing the mistakes, we will strive for a better usage of HTML in the future
